

# ***DSX-2010* Hybrid Alfalfa**

The hybrid alfalfa *DSX-2010* is the second generation of hybrid alfalfas using the msSunstra Hybrid Alfalfa Technology! It delivers the highest level of forage yield with excellent quality forage. It expresses fast re-growth of dense, distinctive fine stemmed forage. This fine stem characteristic makes a dense attractive alfalfa bale and pack better in bunker silos. As the stands of *DSX-2010* get older, the forage yield and persistence advantages become more pronounced.

## **Agronomic Traits**

### ***Disease***

Bacterial Wilt	HR
Fusarium Wilt	HR
Phytophthora Root Rot	HR
Verticillium Wilt	HR
Anthraco nose (Race 1)	HR
Aphanomyces Root Rot (Race 1)	HR
DRI	30

### ***Nematode***

Stem Nematode	R
Northern Root knot-Nematode	HR
Southern Root-knot Nematode	R

### ***Agronomic Traits***

Winter Survival	1.8
Fall Dormancy	4.0
Early Seedling Growth	Excellent
Spring Vigor	Excellent
Summer Re-growth	Aggressive
Drought Stress	Excellent
Growth Habit	Upright
Fineness of Stem	Very Fine
