

Dairyland Seed

A Growing Force

MAGNA 801FQ

Magna 801FQ is a non-dormant, high forage yielding, fall dormancy 8 alfalfa. It is the preferred variety to produce high quality forage for both dairy and beef markets. **Magna 801FQ** has a solid disease, insect and nematode resistance base that provides protection in adverse environments. **Magna 801FQ** response well to inputs that increase forage yield.

Agronomic Traits

Bacterial Wilt	R
Fusarium Wilt	HR
Phytophthora Root Rot	HR
Anthracnose (Race 1)	MR
Verticillium Wilt	MR
Pea Aphid	R
Spotted Alfalfa Aphid	HR
Blue Alfalfa Aphid	R
Stem Nematode	R
Northern Root-Knot Nematode	HR
Southern Root-Knot Nematode	HR
Root Type	Tap
Fall Dormancy	8.0
Cutting Recovery	9.5
Yield Level	9.4
Forage Quality	8.9
Wheel Traffic Tolerance	8.3
